

Historic Pheasant Release Sites

Pheasant releases usually take place twice during the pheasant hunting season; usually the week before the season starts and approximately one week after the season opener. The MHFGA also releases hens in the spring to supplement wild pheasant populations.

- This is subject to the availability of birds provided to us through the Brooks Hatchery and often we only know a short time in advance how many birds have been allocated to our area.

Ducks Unlimited

SW 2-10-8-W4

Private Property Release Sites:

- Note it is YOUR responsibility to look up and contact the landowners to secure permission to hunt these locations!! Historically these landowners have been gracious enough to allow access but ownership / circumstances change over time so be courteous and contact them for access permission and conditions.
